

Safe Carrier

Secondary Containment Bags

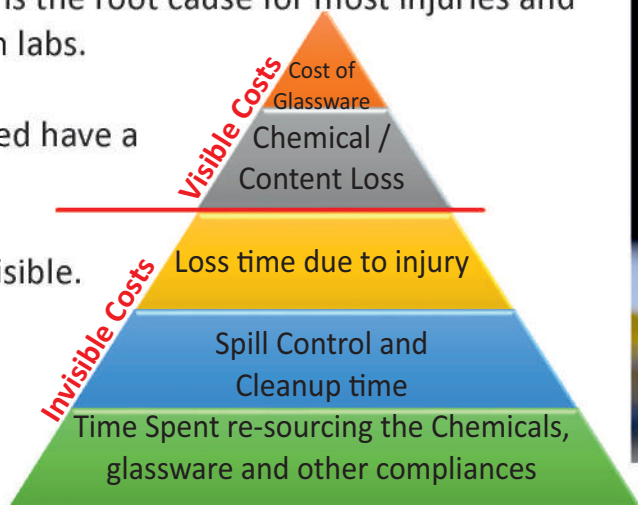

Safe Carrier

Secondary Containment Bags

Handling Glassware safely has been a challenge and unsafe handling is the root cause for most injuries and chemical spills in labs.

The costs involved have a iceberg effect, i.e., real cost of incident is not visible.

We are glad to bring to you **Safe Carrier** the ultimate solution for Secondary Containment of glassware.

Features

- Absorbs energy and transmits minimum shock to glassware during collision / Impact
- Chemical resistant for secondary containment
- Uni-body design with moulded handles to prevent any accidental release
- Spacer ensures stability of small bottles while in motion
- Easy to clean with water and other cleaning agents
- Anti-Fatigue handles and user friendly design
- Made from Rikilite P05 polymers
- Made in India

Multi-Cavity Spacer

Single Cavity Spacer

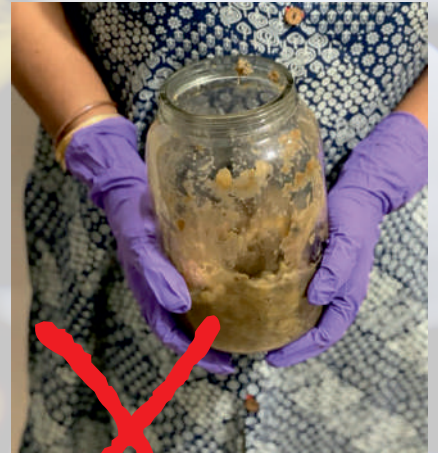

Safe Carrier

Secondary Containment Bags

Workplace injuries involving **Glassware** can happen due to

- Cuts due to glass containers slipping from hand and shattering.
- Collision with objects or third person during movement.
- Improper Storage Conditions.
- Chemical Spills from glassware

Safe Carrier will help reduce these injuries

Shock Absorption

Safe Carrier ensures safety while in motion

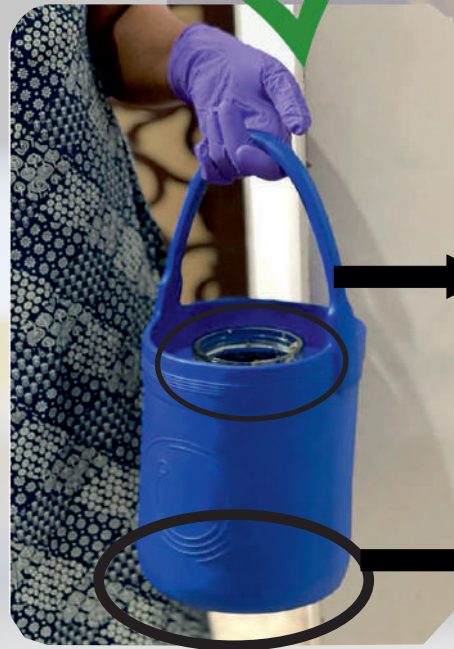

Thanks to the ultra soft material which absorbs energy and transmits minimal shock to the glassware and content

Spacer

Spacers (discs) will ensure the small (1ltr) bottles don't shake.

Universal Slots

It has three slots to accommodate 1ltr, 2.5ltr, 4ltr and 5 ltr bottles

Available in three sizes

Size : 0-4 ltr

Model : SC-L

0-5ltrs

SC-XL

6-10 ltrs

SC-XXL

Comes with Spacer and Lid

Comes with Universal Spacer

No spacer included
